Product Description

Sustāne 8-4-4 all natural fertilizer is ideal for the production of bedding and foliage crops, hanging baskets, herbs and vegetables. Sustāne 8-4-4 is excellent for the production of Begonias, Petunias, Impatiens, Geraniums, Caladiums, Chrysanthemums, and vegetable crops. When used in containers, Sustāne 8-4-4, has a nutrient release profile of 45 days (at 25°C / 70°F).

Medium Grade: SGN 200 (2.8 mm - 1.4 mm)

Direction for Use

Sustāne 8-4-4 provides constant release of nutrient for approximately 45 days when used with container substrates with average temperature of 70°F / 21°C. When determining application rates consider all cultural practices including irrigation, container substrate physical characteristics and growing environment.

Low Rate: Recommended for use on salt sensitive species; when concurrent with liquid feed; with production systems utilizing low leaching fractions (less than 10%); and when applied to heavy potting substrates (total porosity less than 65%).

Medium Rate: Recommended for use on medium feeding species; on most nursery stock and foliage plants; and when liquid feed is not performed concurrently.

High Rate: Recommended for use on heavy feeding species; with production systems utilizing high leaching fractions (greater than 20%); and when applied to light, porous substrates (total porosity greater than 80%).

Container Topdressing Application Rates in grams

Rate	Container Size								
	5" Std.	6" Std.	1 gallon	2 gallon	3 gallon	5 gallon	7 gallon	10 gallon	15 gallon
Low	3	6	7	15	28	45	63	77	82

Low	Med	High	Low	Med	High
9	18	28	4.8	8.8	13.7

Bulk Density of Sustāne 8-4-4 45-day

Rounded Measure (volume)	Grams (weight)
1 teaspoon (tsp)	2.8
1 Tablespoon (Tbs)	8.5
1 oz.	17
1/4 cup	34
1/2 cup	68
1 cup	136

• These rates are intended as guidelines. Sustāne encourages a trial prior to changing any fertilizer program.

• Do not store container mix more than two weeks after incorporating fertilizer. Plant material can be damaged from salt accumulation.

• If mix is stored longer than two weeks, leaching container mix may be required to remove accumulated salts.

• Do not steam sterilize container mix after fertilizer has been incorporated.

• Monitor electrical conductivity (EC) of container substrate throughout production cycle. Adjust application rate as needed.

Net Wt. 50 lb. (22.67 kg)
