SUSTĀNE® 5-2-4 GRANULAR

Recommended Use:

5-2-4 All-Natural is recommended for use in all landscaping environments, for soil amendment, pre-planting, and ongoing plant and lawn maintenance.

Description:

Sustāne 5-2-4 All Natural Slow Release Nitrogen Fertilizer provides 6 - 12 weeks of nitrogen in the organic slow-release form and complies with the National Organic Program standards. Sustāne replenishes the soil with a rich supply of humus (stabilized organic matter) and all of the essential naturally chelated nutrients required for sound and long term soil building programs. Sustāne 5-2-4 All Natural is derived from biologically stable organic compost plus natural sulfate of potash and feather meal (Corn Gluten Meal in EU).

Professional Grade

Sustāne Natural Fertilizer is backed by over 30 years of independent applied research on diverse crops and ecosystems. Unmatched by any other organic fertilizer manufacturer, such research is the foundation for developing products that deliver value under a wide variety of growing conditions. The superior performance of Sustāne's products is recognized by landscapers worldwide.

Benefits of Sustāne 5-2-4 Natural Organic

- Adds approximately 8.5% humates by volume
- Strengthens plants' tolerance of hot, dry conditions
- Greater root development
- Improves buffering against changes in soil pH
- Increases the soil's ability to suppress plant pathogens
- Increased soil porosity and stability for greater root development and water holding capacity

Stabilized Organic Matter

Sustāne 5-2-4 All Natural Slow Release Fertilizer was designed with the knowledge that the best way to grow quality plants is to develop and maintain a healthy soil. While synthetic fertilizers supply plant growth nutrients, they do not supply the organic matter required to maintain quality plant life.
