TURF MAINTENANCE

EARLY SUMMER 9.0.2 **TURF MAINTENANCE**

Suståne Early Summer Turf Maintenance Fertilizer 9-0-2

is a natural and organic professional grade lawn fertilizer that combines Slow Release Nitrogen which helps promote thick lawns and lasting turf color with quickly available natural Chilean nitrate for a fast turf response. Sustane 9-0-2 is made from a combination of aerobically composted turkey litter, green waste compost, feather meal, Chilean nitrate and sulfate of potash. Sustane combines the soil building benefits of compost with rich, natural plant nutrients.

Directions for Use:

Application Timing: May - June

Apply to lawns and landscape areas in May or June once soil temperatures are above 55 degrees F. Sustane can be applied to established lawns as well as new seeding or when laying sod.

Instrucciones de uso:

Tiempo de aplicación: Mayo - Junio

Aplicar a los céspedes y áreas del jardin entre mayo o junio, una vez que las temperaturas del suelo están por encima de los 55 grados F. Sustâne se puede aplicar al césped elegido, así como la siembra nueva o al colocar el césped.

Coverage & Application Rates:

Apply 6 lb. per 1,000 ft^2 with a broadcast spreader (2.9 kg per 100 m²).

Sustane Natural Fertilizers are an important part of the sustainable management of professional turf grass around the world. Golf courses, athletic stadiums, equestrian tracks and public parks rely on Sustane to maintain high quality playing surfaces.

Sustane products work by combining natural and organic plant nutrients with the many benefits of high quality compost:

Benefits of Suståne Compost based fertilizers:

- Slow Release Nitrogen Fertilizer feeds plants for up to 3 months
- Increases the nutrient and water holding capacity of the soil
- Reduces nutrient loss from leaching
- Improves soil structure, porosity, and stability, leading to greater root development
- Environmentally friendly and safe for kids and pets

Suståne's All Natural Lawn Program:

Proper fertilization plays an important role in maintaining a high quality lawn. Sustane's All Natural 4 Step Lawn Fertility Program is designed to provide your lawn with the nutrients necessary to produce dense, green grass. Follow each of the 4 steps to maintain professional quality lawns all season long.

Provides 0.54 lb. of nitrogen per 1,000 ft^2 .

30 lb. covers up to $5,000 \text{ ft}^2$.

Apply 10 lb. per 1,000 ft² if grass clippings are removed or if the turf is heavily used or intensively managed (provides 0.9 lb. of nitrogen per 1,000 ft²).

Covertura y medidas de aplicación:

Aplicar 6 libras por 1.000 pies² con un esparcidor de siembra (2,9 kg por 100 *m*²). Proporciona 0,54 libras de nitrógeno por 1.000 pies².

 $30 \text{ lb. cubre hasta } 5.000 \text{ pies}^2$.

Aplicar 10 libras por 1.000 pies² si se quitan los recortes de césped o si el césped tiene mucho uso (proporciona 0,9 libras de nitrógeno por 1.000 pies²).

Spreader Settings (walk behind)*: *Ajustes del esparcidor*

- Scotts Broadcast Spreaders** 7 Earthway Broadcast Spreaders** 16
 - Scotts Drop Spreaders 15 Earthway Drop Spreaders 20
- AgriFab Broadcast Spreaders**
- AgriFab Drop Spreaders 3

*Spreader Settings may vary due to walking speed and ground conditions. Settings may require adjustment to ensure proper application rates.

4

**Each pass is a 5 ft. (1.5 m) wide interval.

For 10 lb per 1,000 ft^2 , reduce spreader setting by 1 and make two passes.

Sustainable Turf Maintenance Practices:

- Improve soil quality by adding compost. Good soil is the foundation to a quality lawn
- Less frequent but deep watering may result in longer roots
- Mow at a height of 3" to help maintain a thick lawn
- Maintain a high quality natural fertilizer program to encourage new growth
- Proper feeding, mowing and watering is the best way to maintain a beautiful lawn
